NURSES NOTES

DATE	TIME				
8/5/10 3:50pm		Mr. Seiber was escorted to medical for doc. charge to inside of ankle on (R) foot. I/M has been at this facility since Sept. 22, 2009. We have been treating this mass off and on with antibiotics and ibuprofen, cleansing with sterile H ₂ O and saline) and applying clean dry dressing. He has pain radiating from his foot into the (R) groin. He has a swollen area in his (R) groin that is tender to touch. There has been no change in size or appearance of this mass but it has started draining a greenish yellow colored fluid and has a foul odor. There is no distress noted. Dr. Townsend has requested that we send him stat to another physician for possible removal of mass.
